

Day 5 Lab

A restaurant owner wants to create a Webpage to display menus along with prices and videos of popular dishes.

Create an HTML page using text formatting tags and select some videos from the internet. Use internal styles.

A sample page should look like this:

The screenshot shows a web browser window with the address bar displaying 'C:/Users/Anju/OneDrive/Desktop/restaurant.html#'. The title bar says 'Glenary's Restaurant'. The menu is displayed in two cards:

- Menu**

Pizza Supreme
Pizza sauce, mozzarella, bacon, onion, beef mince, capsicum, pepperoni, mushroom, olives
Price: ₹250
- 
Paneer Tikka
Paneer, Yogurt, Ground Spices, Bell Peppers, Onions, Baby Corn, Mushrooms
Price: ₹200

A screenshot of a restaurant website. At the top, there's a header bar with icons for back, forward, file, and search. The URL 'C:/Users/Anju/OneDrive/Desktop/restaurant.html#' is visible. Below the header, there are two cards for different dishes:

- Pizza Supreme**: An image of a pizza with various toppings. Description: Pizza sauce, mozzarella, bacon, onion, beef mince, capsicum, pepperoni, mushroom, olives. Price: ₹250.
- Paneer Tikka**: An image of paneer tikka skewers. Description: Paneer, Yogurt, Ground Spices, Bell Peppers, Onions, Baby Corn, Mushrooms. Price: ₹200.

Popular Dishes

Ask ChatGPT

Suppose you want to create the user interface for two different types of websites. One is a Hospital website and another is a MovieTicket booking website. You want to know what is the correct choice of colors for these websites. Design a prompt and ask ChatGPT to help you with good and bad UI.
